Homework 1.3 Question

We are now going to test that you have bottle installed correctly and can run a bottle-based project. Download the handout and run it as follows:

```
python hw1-3.py
```

It requires that:

- bottle be installed correctly
- your mongodb to be running
- you have run mongorestore properly

From a different terminal window type the following from the command line:
curl http://localhost:8080/hw1/50

Alternatively, you can put the url above into your web browser.

Type the two-digit answer into the box below (no spaces).
